on green formulations*

FORMULA VII :

“How Does Your Formulation Work?”

The Institute of Material Science of Mulhouse (IS2M, CNRS-UHA), the Laboratory of Photochemistry and Macromolecular Engineering (LPIM, UHA), the Institute Charles Sadron (ICS, CNRS-UDS), the School of Chemistry of Mulhouse (ENSCMu) and the University of Haute-Alsace (UHA), cordially invite academic and industrial researchers to participate to the Conference Formula VII, to be held in Mulhouse, France, on July 1-4, 2013.

FORMULA VII will be a chance to glimpse into the future of Formulation technology, teaching and to shape research in formulation science.

FORMULA VII will focus on:

- **Design of formulations**
- **Applied colloidal systems**
- **Processes and scale-up**
- **Characterization, modeling and properties**
- **Surfaces and interfaces**
- **Advanced formulations**

Scientific Program

The FORMULA conferences are the major international events devoted to Formulation Science, Technology and Teaching, highlighting progress in the field. They are the place of choice where industry and academia meet to share progress and insights, forge alliances, recruit talents and harvest knowledge.
